IN-COUNTRY PARTNER TRIPS

Who We Are, What We Do

Rise Against Hunger invites you on a life-changing experience to visit our meal distribution partners abroad. You will have the opportunity to experience first-hand the impact our meals are having as well as receive a deeper understanding of Rise Against Hunger's vision to end hunger in our lifetime. You will see how your company's volunteer service contribution and meal donations are making a difference in the lives of others.

The Opportunity

Our In-country Partner Trips are designed to provide a deep experience in one country with our in-country partners. You will spend several days visiting with our partner program managers, learning about their country and their development programs, and seeing first-hand the difference our meals are making abroad. You will have the chance to interact with recipients of Rise Against Hunger's meals in programs such as schools, orphanages, and medical clinics to gain a better understanding of the various approaches to hunger and poverty relief in the region.

Benefits *By joining an In-country partner trip, you will:*

- Understand the broad and positive impact these meals have on the hungry in the region.
- Gain a full understanding of the challenges surrounding feeding the world's hungry and how your company can best help.
- Discover how you and your company might further support Rise Against Hunger in our efforts to provide transformational change with our in-country partners abroad.
- Develop a deeper passion to help Rise Against Hunger, our partners, and your employees end hunger.

Testimonial

"In March 2014, I had the opportunity to serve alongside Rise Against Hunger in Nicaragua. Zambrero funds the cost of ingredients for meals through our Plate 4 Plate initiative. In Nicaragua, not only did I get to cook and serve the meals but I saw the impact of meals first hand. I am inspired by Rise Against Hunger's relationship with in-country partners such as ORPHANetwork in Nicaragua to work together to create a social movement to end hunger."

Amarjot Kaur, CMO, Zambrero
